

LINNRON SPEAKERS

Years of trial and error finally produced a lightweight yet powerful and unbelievably clear sound in a small square dance speaker. Here are just a few of the callers and cuers currently using LINNRON speakers: Ken Bower, Gary Shoemake, Wade Driver, Marshall Flippo, Darryl Lipscomb, Mike Seastrom, Sonny Ezelle, Bob Shiver, Henry Israel, Annie Brownrigg, Tom Russell, Bill Wright, Jerry Stover, Mike Olson, Tom Welker, Vernon Nelson, Michael Hines, and Pam Young.

The **LINNRON Small Speaker Stack** consists of two cabinets connected by lift-off hinges and one comfortable carrying handle. Each cabinet contains one 8 ohm 6" x 9" speaker, a 1/4" phone jack connector, 1 3/8" Top Hat stand adaptor for use on standard speaker stands (reducer sleeves for Hilton stands are available), and gold aluminum Lincane screens. A standard Radio Shack parallel Y connector should be used to reduce the output to 4 ohms increasing the power output without overheating your amplifier. This small stack easily covers 15-20 squares.

Each small speaker stack weighs approx. 20 lbs or less, not including its cardboard carrying case. They measure approx. 14" high, 8 1/2" wide, and 8" deep. The overall measurement when folded is approx. 17" high, 14" long, 8" wide.

These handcrafted airtight pine cabinets come finished in your choice of any oil based Minwax stain and sealed with semi-gloss polyurethane.

Item# 69X2A

Small Speaker Stack

[two cabinets with lift-off hinges with a total of two 8 ohm 6" x 9" speakers]

\$275 + shipping
